Solutions Jettyless energy transfer – the link that is no longer missing. A jettyless transfer system is floating technology that enables safe and efficient transfer of fluids such as LNG, ammonia, bio fuels and CO₂ (for carbon capture and storage) between a carrier ...

Energy transfers: Bungee Jumper. At the start of the jump, all the energy in the system is the store of gravitational potential energy. As the jumper falls, energy is transferred from the gravitational potential energy store to the kinetic energy store. When the bungee rope just starts to tighten, the

kinetic energy store is now at its maximum.

Traditional energy infrastructure projects are high risk- and expensive investments, sometimes in environmentally sensitive areas. We provide floating transfer solutions, unlocking fast-track market opportunities and supporting the full lifecycle of our customers' assets.
