Engine Will Not Start On Propane (Basic Troubleshooting) 1.) The first and most important step is to make sure that you are using a propane tank that has been refilled multiple times. (at least 4 times.) Tanks that have not been filled multiple times. will have air trapped inside of them causing the fuel mixture in the carburetor to be too lean.

Parts Breakdown. How to use: Locate your Karcher model number, then click "Download PDF" in the corresponding column, which will open the PDF file in a new browser window. Scroll through the PDF file diagrams until you locate your particular part. Note the reference number beside the part item, then scroll down or click the next page button within the PDF.
