Honda's GX series engines
are legendary for superior
reliability and performance
and the GX160 is no

exception. Lower noise levels, lower vibration, and lower emissions – without sacrificing power output or performance. Being the Flagship model in Honda's world-renowned GX Engine range, the GX160 can be used in all sorts of

applications.

Torque values are derived at 2600 rpm. Actual power output for the engine installed in the final machine will vary depending on numerous factors, including the operating speed of the

engine in application,
environmental conditions,
maintenance, and other
variables. Additional
