Jan 23, 2006 · fa-kin-a. "The
Z24 engines are reputed to
be prone to head gasket
failure and not last more
than 100k miles." This 2.4L
engine was carbed and used

in the Nissan 720 pickup around '85-'86...later EFIed. A browse thru some forums involving this truck shows a different opinion...saying that some engines lasted over 200K miles and were driven hard.

Part of the decision to use this cast iron manifold was that a lot of vehicles that use the Z24 engine are designed for harsh environments and off road use. Cast iron manifolds are very strong

and can stand up to high G loads and vibration whilst supporting the weight of the turbo and exhaust system.

Buy used Nissan D21 Pickup motors/engines from our network that offers up to a two-year warranty on qualified units! We carry a

The Nissan Z series of engines ranged from 2.0 L to 2.4 L and were produced from 1979 through August 1989. The Z series engines retained a nearly identical block to the earlier Nissan L engine with the exception of

the Z24 which utilized a taller deck height to increase engine displacement. The most notable feature of the Z-Series engine was the introduction of the crossflow cylinder head which ...

Feb 28, 2013 · I have a
1986.5 Nissan D21 4X4 pu.
First hardbody. In great
condition body wise. I have
owned this pu since it was

born. I have not had any success in replacing the old Z24 engine with rebuilds, three in all. They all broke down in about a year. I decided to put a used engine in it and now it's starting to break down. I love this pu.
